About Me

Systems Engineer with initial experience in web development and technical support, specializing in frontend. My strengths include quick adaptation, effective problem solving, and results-oriented teamwork. I am looking to join a dynamic environment where I can contribute my technical skills to develop innovative and efficient solutions from the outset.

Experience

Foo Talent Group

October - December 2025

Frontend Developer

Developed a comprehensive platform for independent real estate agencies using Next.js and TypeScript. Implemented the complete administrative module, real-time metrics dashboards, and reusable components. Integrated testing with Vitest, validations with Zod, and adopted Server Actions along with Conventional Commits for a robust development flow.

YourBestDev

August 2025

Full-Stack Developer

Developed and maintained modules for a SAAS ERP in Laravel for the company Punto Ferretero, where I implemented improvements to the POS system including cash management, customer search, and barcode generation. Created a pre-sales system and optimized the task monitor with Livewire to provide real-time updates.

Zyroex

April 2025 - July 2025

Frontend Developer

Designed and created websites using React and Astro with reusable components and implementing rendering strategies (SSR/SSG) that improved performance and SEO positioning. Optimized legacy code and managed integrations to ensure efficient collaboration within the team.

Education

Universidad Bicentennial de Aragua

September 2019 - March 2024
